

At GallegoPlast, s.l. we work tirelessly to provide support to our customers, suppliers, employees and our community.

During these unprecedented months, our aim to contribute to a safer future has become our priority. From our factory, through our supply chains to consumer homes, as well as hospitals and nursing homes, we ensure that we continue to meet the hygienic and food safety needs that are so necessary in these difficult times.

With flexibility, solidarity and courage we want to combat this important challenge, accompanying all families, people in isolation or in serious situations, doing our utmost to provide everyone with a continuous service of safe and hygienic products.

Let's protect our health. We can do it together.
